The CARBON FARMING project

Context

Programme: Erasmus+

Action type: KA220-YOU - Cooperation partnerships in youth

Duration

24 months

Project Start Date: 02-10-2023

Project End Date: 01-10-2025

Applicant organisation:

NEW AGRICULTURE NEW GENERATION
(NEAGEN) Greece (Athens)

Partner organisations:

1. AKEP – Greece (Athens)
2. Theophrastus Research Institute – Greece (Mytilene)
3. CENTOFORM - Italy
4. ASOCACIÓN ECOVALIA - Spain
5. AGROBIO - Portugal

The infographic is divided into four horizontal sections. The top section features the Carbon Farming Hub logo, which includes a stylized plant with a CO2 molecule and a circular arrow. The second section, titled 'Applicant Organization', shows the logo for 'NEW AGRICULTURE NEW GENERATION', which consists of a green square divided into four quadrants. The third section, titled 'Partners', displays five logos: 'Academy of Entrepreneurship' (a colorful triangle), 'THEOPHRASTUS RESEARCH INSTITUTE' (a green leaf), 'Centof0rm' (a blue circle with a white dot), 'ecovalia' (the word in green), and 'agrobio' (a red ladybug on a green leaf). The bottom section, titled 'Co-funded by the European Union', shows the European Union flag and the logo for the 'YOUTH AND LIFELONG LEARNING FOUNDATION', which features a stylized head profile.

Scope of the project

The main project objective **is to create a network of carbon farming awareness hubs located in the 4 partner countries** (GR, IT, ES, PT) . The project addresses the need of both increasing awareness and enforcing the skills of young citizens and farmers to be ready to face the new challenges and exploit modern socio-economic opportunities for sustainable societies presented by initiatives like the Farm2Fork strategy and the Green Deal.

Target

- Young people who are interested in organic agriculture and intend to create their Start-up.
- Farmers wishing to convert their transitional farms into organic
- Experienced farmers who would like to share their land with young aspirants in order to skill them and acquire effective coworkers
- Relevant stakeholders
 - National, regional and local stakeholders who might be interested in the project (including associated partners) and in participating in the initiatives of the CarboFarmHub, e.g. local/regional policy makers, representatives of BSOs involved in the CAP initiatives, farmers' associations interested in identifying new business models and income opportunities for farmers.
 - Partner's staff members who will be involved in different activities.

Expected results

Development of 1 detailed document describing in detail the Global Framework of at least 7 initiatives (awareness raising and outreach activities) that partners will implement both at local and at international level.

Development of 1 EU Digital CarboFarmHub space for collaboration, exchange and fruition of the various online/hybrid initiatives which will guarantee large visibility and full accessibility for all interested people

Global framework of CarboFarmHub initiatives tested in Greece, Portugal, Spain and Italy,

CarboFarmHub virtual exchange space tested in Greece, Portugal, Spain and Italy.

Co-creation of a policy brief displaying recommendation to policy makers.

1 Project Website with information on project's aim, activities and results.

Until today we have implemented 4 Online Transnational Project Meetings (OTPM)
